Google Scholar · ORCID 0000-0003-2470-6676 · GitHub

Ph.D. expected February 2027. Available for a postdoctoral position from March 2027.

Research Interests

Database systems and vector data management: graph-based approximate nearest neighbor search (HNSW), index maintenance under updates, robustness to out-of-distribution queries, hardware-conscious index layouts, retrieval-augmented generation, and machine learning for database tuning.

Education

Ph.D. in Computer Science Mar. 2024 – Feb. 2027 (expected)
Yonsei University, Seoul, Korea
Dissertation: *Optimizing Efficiency, Updatability, and Robustness of HNSW Indexes for High-Performance Vector Search*
Advisor: Prof. Sanghyun Park

M.S. in Computer Science Mar. 2020 – Feb. 2022
Yonsei University, Seoul, Korea
Advisor: Prof. Sanghyun Park

B.Eng. in Computer Science and Technology Sep. 2014 – Jun. 2018
Yanbian University, Yanji, China

Publications

Selected publications (first author)

Publications in Korean venues

Seven papers in Korean venues (Communications of the KIISE, KIISE Transactions on Computing Practices, KCC, KIPS), including a first-author survey on retrieval-augmented generation and vector databases in a special issue of Communications of the KIISE (2024). Full list at huijunjin.github.io/publications.

Patents

[P1] Sanghyun Park, **Huijun Jin**, Jieun Lee, Shengmin Piao, Sangmin Seo, Sein Kwon. Method and Program for Approximate Nearest Neighbor Search via Data-Adaptive Parameter Adjustment. U.S. Patent Application Publication US 2026/0141002 A1, May 2026 (priority: Korean Patent Application 10-2024-0166800, Nov. 2024).

[P2] Sanghyun Park, **Huijun Jin**, Jieun Lee. Database Tuning Method Using Deep Genetic Algorithm. Korean Patent No. 10-2727561, granted Nov. 2024.

[P3] Sanghyun Park, **Huijun Jin**, Jonghwan Choi, Won Gi Choi, Hanseung Sung. Method and Apparatus for Tuning Database Based on Machine Learning. Korean Patent No. 10-2703138, granted Sep. 2024.

Also co-inventor of two pending Korean patent applications in database parameter tuning.

Research Experience

Researcher (post-master's), Data Engineering Lab, Yonsei University Mar. 2022 – Aug. 2022
Software development and database testing for the S/W Starlab project (IITP, Korea).

Conference Presentations

- CAMP-HNSW — VLDB 2027, Athens, Greece (scheduled, Aug. 2027)
- PRO-HNSW — ICDE 2026, Montréal, Canada
- DHNSW — DATE 2025, Lyon, France
- RTune — GECCO 2022, Boston, USA

Teaching

Teaching Assistant, *Database Systems*, Yonsei University Mar. 2020 – Jun. 2020

Teaching Assistant, Yanbian University Academic year 2018 – 2019
Assisted undergraduate courses across the department: in-class interpretation and help with assignments.

Awards and Scholarships

- Best Paper Award, KIPS Fall Conference (Korea Information Processing Society) 2020
- Academic Research Fellowship (ARF), Yonsei University 2026
- BK21 Scholarship, Yonsei University 2025 – 2026
- Special Scholarship for International Students, Yonsei University 2020 – 2022, 2024 – 2025
- National Scholarship, China 2017

Skills and Languages

Programming C++ (index engines), Python (experiment pipelines and analysis)
Systems Graph-based vector indexes (HNSW), RocksDB, Redis
Languages Korean (native), Chinese (native), English (professional working proficiency)
